VIT Bhopal University

Digital Literacy Project Report

Course Code: CSE0001

Course Title: Digital Literacy

Name: Vaishnavi Jain

Role: Student Digital Ambassador

Introduction

In today's digital world, having proper digital literacy is essential for students. This project was assigned to develop awareness and practical skills related to online platforms, communication, cybersecurity, and professional presence. As a Student Digital Ambassador, my role is to guide peers in using digital tools safely and effectively.

This report presents my Digital Literacy Portfolio, which includes five tasks covering presentations, online profiles, digital platforms, email etiquette, and cybercrime awareness.

Task 1: Digital Presentation

For this task, I created a presentation using Canva to introduce the concept of digital literacy. The presentation included topics such as online identity, digital communication, cybersecurity basics, and responsible usage of the internet.

The design was kept simple and visually appealing with proper use of colors, icons, and short text points. I focused on making the content easy to understand for students with no technical background.

Learning Outcome:

I learned how to present information effectively using visual tools and how to simplify complex topics into easy explanations.

Task 2: Online Portfolio

In this task, I created and updated my online profiles such as GitHub and LinkedIn. I added my personal details, skills, educational background, and a brief description about my learning goals.

I also ensured that my profiles look professional by adding a profile photo and organizing the information properly.

Learning Outcome:

This task helped me understand the importance of maintaining a professional digital identity and how it can help in career growth.

Task 3: Digital Platforms

For this task, I explored different digital learning platforms such as VITyarthi and GitHub. I performed activities like accessing course materials, uploading assignments, and exploring repositories.

I took screenshots as proof of my activity and noted down how each platform works.

Learning Outcome:

I learned how to use online platforms effectively for academic purposes and how they support collaboration and learning.

Task 4: Email Etiquette

In this task, I learned how to write professional emails. I created sample emails including subject lines, greetings, body text, and proper closing.

I followed important rules such as:

Using clear subject lines

Being polite and concise

Avoiding informal language

Checking grammar before sending

Sample Email:

Subject: Request for Assignment Clarification

Dear Sir/Ma'am,

I hope you are doing well. I am writing to request clarification regarding the Digital Literacy project assignment. I would appreciate it if you could guide me on the submission format.

Thank you for your time and support.

Regards,

Vaishnavi Jain

Learning Outcome:

I understood the importance of professional communication and how email etiquette reflects one's personality.

Task 5: Cybercrime Awareness

For this task, I studied a cybercrime case related to phishing. Phishing is a type of online fraud where attackers try to steal sensitive information like passwords or bank details by pretending to be a trusted source.

Case Study:

A student received an email claiming to be from a bank asking to update account details. The email contained a fake link. When the student entered their details, the attacker accessed their bank account and caused financial loss.

Prevention Tips:

Do not click on unknown links

Verify email sender details

Use strong passwords

Enable two-factor authentication

Never share OTP or personal information

Learning Outcome:

This task increased my awareness of cyber threats and how to stay safe online.

Conclusion

This Digital Literacy project helped me gain practical knowledge about online tools, communication, and cybersecurity. I learned how to build a professional online presence and interact responsibly in the digital world.

As a Student Digital Ambassador, I feel confident in guiding others and spreading awareness about safe and effective digital practices.
